Sue,

I apologize if I was supposed to update a database and missed an email? But here is the status of the SI.

The two rounds of private well sampling was completed and validated results have been received. The OSC has shared the results with the home owners. EPA has started onsite activities this week as part of the SI including surface water and sediment, groundwater well installation and well sampling.

Connor,

For Blades, the PFAS database says "Private well sampling ongoing." Is that true or should I delete?
